Phone 906-249-1899

Disclaimer Notice: In order to avoid any misunderstanding in the location of antennas and temp probes or other needed modifications, please use and complete this instruction sheet and email or fax it back to us at 208-275-5589. Please do not call measurements in or use forms from another company, we cannot guarantee that the required modifications will be made or made correctly. We will not be responsible for any misunderstandings that might occur outside of the correct use of this form. If a customer insist on providing measurements by other means than this form, we will be not responsible for any misunderstandings or incorrect placement of modification onto cover even, if we accept these measurements by other forms or methods. All return shipping will paid by the customer. This form is a proven method that will ensure a consistent line of communication that will help eliminate any confusion or delays in the production of your cover. Thank you very much for your order! Incorrect measurements that are provide by the customer and installed onto the cover and needs corrective service will be subject to a $25.00 service fee for installation of correct alterations plus shipping to and from out location.

P.S. Your order is in process and if we do not hear from you, I will assume that there is no need for modifications.

Make _____

Model _____

Year _____

Tail Number _____

Name _____

Phone _____

Your N# can be embroidered onto your new cover!!

We can embroider the tail number of your aircraft onto your new cover for an additional $12 or one on each side of the cover for $20. If you would like your N# placed onto your cover please list it below or let us know and we will invoice you via PayPal. Email us at sales@airplane-covers.com we also take Visa, Master Card and Discover.

Tail Number _____ One side _____ $12.50 Both Sides _____$20.00

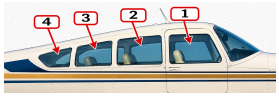

Photos of your aircraft would be very helpful. If possible, please include side, front and top antenna views. Photos are not intended to replace measurements requested. Measurements are still required and will be used to install modifications. Please measure all antennas on the cabin and baggage area.

View measuring instructional video at www.MacsAirplaneCovers.com

1. Windshield

Measure from the top center of the windshield down to the bottom center of the windshield.

This measurement is _____ inches.

2. Viewing from one side of aircraft, how many side windows 1_____ 2____ 3____ 4____

3. Temp Probe

Measure down from the top of the windshield down to the probe	Measure over from center of windshield to center of probe	Temp probe is on Pilots side	Temp probe is on Passenger side	Temp probe is in center of the windshield

If you have a temp probe in a different location other that the windshield, please let us know. Additional measurements and photos may be needed.

Refer to antenna farm picture on front page.

4. Antenna measuring instructions: Refer to antenna farm photo

Back Measurement: Measure from the top center of the windshield down the centerline of the cabin to the center (90 degrees) of the base of the antenna.

Over Measurement: Measure from the centerline over to the mid center of the antenna base.

All measurements are to be in inches unless otherwise noted on this form.

	Antenna Type Refer to Antenna Farm	Measure Back from Top of Windshield To center of Base of antenna	Measure from center line of cabin over to the center base of the antenna	Antenna is on Pilot side	Antenna is on Passenger side	Antenna is on Center line
